SWEDESE

We all have the same basic needs, more or less. We want to experience security and togetherness, express and receive appreciation and not least, achieve fulfilment.

At Swedese, we've been designing and building furniture for more than 70 years with people in mind – people just like you and me. And that's the way it will stay.

Furniture and interiors which simplify and bring joy to our lives, whether we're in a public space or at home in our own living room. Comfortable, timeless and beautiful. Although many of our products are world-renowned, they always keep their feet on the floor.

The Swedese Home Collection reinforces our sense of

humanity. The thing we're all looking for, that makes us feel secure, happy and appreciated, and acknowledges us as informed, responsible people with open minds.

The Swedese Home Collection features many of our most cherished and much-loved models, some of which have become national icons as time has passed. Here you'll find our

most exciting new products and maybe some future classics alongside. Chairs, easy chairs, sofas, tables and accessories boasting charisma and identity. But above all, personal products in perfect harmony with your home, your identity and whatever you choose to surround yourself with.

Swedese Home Collection – you can't get closer to home.

A PASSION FOR DESIGN AND FOCUS ON SUSTAINABILITY

This has been part of our identity and DNA since the company was founded in 1945. Our passion for design has contributed to creative solutions and successful furniture for decades. With no exceptions, all furniture by Swedese is independently produced on our own premises in Vaggeryd and Äng, ensuring we can preserve our genuine craftsmanship and exceptional quality. This is also how we can assess and minimize our environmental impact. At each stage of the manufacturing process – from idea to production, choice of materials, purchasing, premises and transportation – we take a reflective, responsible and sustainable approach to our work.

A close-up photograph of a wooden chair back, showing several curved slats made of light-colored wood. The slats are arranged in a crisscross pattern, with some overlapping others. The wood grain is clearly visible, and the lighting creates soft shadows and highlights on the curves of the slats. The background is a plain, light color.

EASY LIVING BY SWEDESE

Comfortable, sustainable furniture can't be made in an instant. You can't trick the body or the eye, and you can't cheat time. It has to look great, and requires a meticulous approach to materials and small details as well as an eye for aesthetics and an awareness of sustainability and the environment. The Ekström brothers and their associate Bertil Sjöqvist had all this worked out when they founded ESE-möbler in Vaggeryd, Småland, back in 1945. And they got it right, right from the start.

We're still based in Småland, and we're still committed to innovation, sustainability and new ways of thinking. And we continue to strive for exceptional design and genuine craftsmanship while building long term relationships with our friends through flexible business solutions. The pledges made in the past inspire us today and form the vision of the future
